PROFESSIONAL PROFILE

A tech student with a strong interest in development, digital transformation, data and emerging AI technologies. Hands-on experience developing web and Android applications using PHP, MySQL, JavaScript, Kotlin and Jetpack Compose, with practical exposure to database design, CRUD operations, authentication, responsive UI development and modern application architecture.

I am a developer who loves to turn real-world problems into practical technology solutions. I have built personal and project-based applications, including mobile apps that use MVVM, Room Database, Kotlin Coroutines and Flow as well, as database-driven web platforms. I am also experienced in WordPress development, customizing themes and plugins to deliver user-friendly websites. Additionally, I am interested in data preparation, SQLbased analytics, and presenting meaningful business insights through dashboards and reports through academic projects. I am eager to learn to work with multidisciplinary teams and to help create enterprise-scale technology solutions.

TECHNICAL SKILLS

Programming languages: Kotlin, Java, JavaScript, PHP, HTML5, CSS3.

Databases & Data: SQL, MySQL, SQLite, Room Database, Database Design, CRUD Operations, Data Validation, Data Preparation, Data Modelling.

Data Analytics & Business Intelligence: Power BI, Excel, and Business Insights.

Mobile Development: Android Studio, Jetpack Compose, Material 3, MVVM, Navigation Compose, Kotlin Coroutines, Kotlin Flow.

Web Development: ASP.NET Core, PHP, JavaScript, HTML, CSS, Responsive Web Design, Authentication, Role-Based Access, WordPress (themes, plugins, customization).

EDUCATION

BACHELOR OF INFORMATION TECHNOLOGY IN WEB DEVELOPMENT AND DESIGN

Institution Name — Stadio Higher Education
Expected Completion: 2026 (started in 2024)

KEY PROJECTS

Textbook-Hub (Android Studio using Kotlin, RecyclerView, SharedPreferences, Constraint Layout, CardView and In-memory storage).

- It's an app user higher education students, it allows the user to Register, user Login, Add Textbooks, View Textbook, View the Listings of the books added, Search Textbooks, View Seller Details, the ability to Mark Books as Sold or Available if you are the one selling the book, Appointment Scheduling, search functionality, searching for users, ability to edit your profile and Notifications.
